## PROFESSIONAL ATTRIBUTES

A driven, proactive and motivated front end development professional with more than a decade's worth of experience. I'm well versed in UI/UX development, having been involved in the development of projects for various international clients and companies. As part of a development team I have provided high end code on large scale production web and mobile sites, with a strong focus on maintainability and scalability in a fast-paced, dynamic environment.

Seeking a **Front End Development, UI / UX Development, UI Design or Web Development position**, that follows current development and design trends, with which will afford me the opportunity to deliver high end products to clients and successfully meet business requirements.

## CORE COMPETENCIES and ACHIEVEMENTS

- Involved in the entire development life cycle of a project, from concept, to design, to development and coding right through to the final delivery as well as post live maintenance and updates
- Experience building cross platform responsive websites for mobile and tablet devices as well as troubleshooting and problem solving cross browser compatibility issues.
- I've developed and evolved my skills to keep up with current trends, technologies as well as business requirements
- Ensuring that design requirements remain consistent across the various supported platforms and environments.
- A strong proponent of web standards, I'm always striving to present well formed, well-structured reusable code in accordance with W3C standards

## EMPLOYMENT HISTORY

**September 2018 – November 2019**

**Senior Engineer: Front End IHS Markit**

- Working with a co-located global team of developers updating the in-house front end development platform
- Over-seeing the web based application UI prototyping, wire framing, prototyping and development, including layouts and design
- Working and liaising with product owners and stakeholders on the development of the current project
- Peer-to-peer development with the Back-End team in the proper implementation of HTML5 / CSS3
- Maintaining responsive development standards and methodologies
- As the in-house UI Specialist I have to establish user journeys and product workflows
- Conduct Front End Code Reviews for our globally distributed development teams

**September 2016 – October 2018**

**Senior AEM Front End Developer Datonomy Solutions (Contracted to Shoprite Holdings)**

- Responsible for implementing and maintaining web standards across all customer facing brands, ensuring that industry standard trends and best practices are adhered to at all times.
- Liaising with the marketing manager and clients to ensure that the end product meets with design requirements and specifications.
- Updating and improving front end development standards and best practices to comply with current trends.
- Following and updating the existing style guide and implementing designs for web and mobile as needed.
- Setting objectives and goals for the front end team, ensuring that they are met
- Doing peer-to-peer development and mentoring junior members in HTML5 / CSS3 and web development standards

## **March 2013 – July 2016**

### **Lead Front End Developer Media 24: Careers24**

- Developing, maintaining and deploying websites for modern web browsers and mobile devices
- Collaborating with product managers, marketing specialists and support staff to create and deliver high quality websites that meet customer needs and business expectations.
- Building templates based on PSD's using advanced CSS / HTML, CSS3 / HTML5, JQuery Integration, as well as AB Testing through Optimizely.
- Skilled in Web Design and Web Development

## **October 2008 – February 2013**

### **Front End Developer Media 24: 24.com**

- Lead front end developer on three large scale flagship products, involved in various aspects of design and development.
- Spearheaded the initiative that pushed for the adoption and implementation of CSS3 / HTML 5 / Boilerplate and the Bootstrap framework in our development process by providing various proofs of concept highlighting the benefits and advantages of these technologies.
- Ran with the pilot project for using newer technologies prototyped on Sport24 Multimedia
- A complete redevelopment and redesign of Health24 using HTML5 / CSS3, the HTML5 Boilerplate framework as well Bootstrap, also implemented extensive jQuery.
- Worked with the sales and marketing department on various campaigns in providing media and advertising for 24.com's websites
- Developed and implemented the UGC (User Generated Content) section of the News24 homepage, as well as the MyNews section of the website.

## **October 2007 – September 2008**

### **Web Master Media 24: MyWeek Magazine**

- Managed a wide range of web development priorities such as Web Design, Graphic Design, Banner Design, Email Branding, Web Maintenance, Web Administration, Content Management, Client Administration, Online Marketing, SEO
- Worked autonomously applying print magazine based designs and copy into an online presence
- Met with various third party consultants to implement Email Branding and advertising

## **June 2004 – December 2006**

### **Web Author ForwardSlash / Digital Outsource Services**

- Assisted various marketing departments in developing and maintaining campaigns and advertising for international clients
- Bi-Monthly promotional updates and maintenance on client websites
